Releasing suppressed Exotic Technologies, Mystery Drones

Elena Danaan, Michael Salla

Releasing suppressed Exotic Technologies, Mystery Drones and Extraterrestrial Disclosure

https://rumble.com/v6b3d9y January 23, 2025.

Elena Danaan reveals how the release of exotic technologies long suppressed by the Deep State are being released through a process whereby these are claimed to be new inventions. This process is part of a disclosure plan developed jointly between the Galactic Federation of Worlds and the Earth Alliance delivered to the head of US Northern Command in January 2023, according to Danaan's chief Federation contact, Thor Han Eredyon.

Danaan also explains the different types of craft that make up the mystery drone phenomenon, which despite Deep State efforts to confuse and distract the general public, is leading inexorably toward the public realizing many of the drones are, in fact, antigravity spacecraft belonging to extraterrestrial civilizations and the Earth Alliance. She further explains the real reasons why Elon Musk wants to bypass the Moon and go straight to Mars to set up manned colonies.

Finally, Danaan gives an update on the discovery of abandoned transportation craft containing hundreds of

millions of Gray-human hybrids and the failed Gray hybrid agenda, along with the creation of an advanced space station in orbit around Jupiter that is very similar in function to the station depicted in the popular Sci-Fi show, Deep Space Nine.

DR. SALLA: Elena Danaan is a former French archaeologist. She has had extraterrestrial contexts since childhood. She is the author of four best-selling books and she has information about the Galactic Federation of Worlds and how they are involved in the Trump administration for disclosure of the extraterrestrial presence.
ANNOUNCER: You are listening to ExoPolitics Today with Dr. Michael Salla, your source for the uncensored truth regarding the human, extraterrestrial, global and political agenda. Click the like button and subscribe to this channel. And now, here is Dr. Michael Salla.

DR. SALLA: Well, welcome Elena to ExoPolitics Today.

ELENA: I'm very happy to be here again.
Dr. Salla: Wonderful to have you back on the show. I think it's a very momentous time we're in with this Trump administration that has been newly installed. And one of the things that was kind of like said at the end of the first Trump administration was this Professor Haim Eshed, who said that Trump was working with the Galactic Federation for disclosure, but the Galactics said that we weren't ready yet in terms of our technological development.
So how does that carry over to this new Trump administration? What do you think is going to be a major priority for this new administration?
Elena: Well, at the time Haim Eshed disclosed this information, the political scene was still unstable and the timeline of events was still unstable. And it was proven that it was the case where the next election round was different. So the disclosure of technologies, what type of technologies are we talking about?
We are talking about exotechnologies, retroengineered technologies and all sorts of transport and devices that have been developed from this retroengineering from alien spacecrafts. These technologies have been used since the 1950s by diverse programs.

The disclosure is regarding the plan of the Galactic Federation is to happen progressively by reintroducing these technologies into the industries of different countries. Disclosing technologies suddenly would disrupt the balance of the economy or the countries. Also, it would be a shock. The purpose is not to create chaos and stress, it is to reintroduce this technology. That is what the federation has decided together with White-Hat political leaders. This incoming Trump administration from what I know is going now to kickstart the implementation of these retroengineered technologies that in fact have been used in secret programs since the 1950s. It is going to be reintroduced progressively, but quite fast.

DR. SALLA: That is a picture of Thor Han Eredyon who is really your kind of principal contact with the Galactic Federation. When did he first tell you about this plan to release these old technologies as though they were new technologies for this kind of like administration?

ELENA: In February 2022, he was meeting the former director of NORAD, General Vanherck, to give him an updated plan of the disclosure of these technologies as well as the extraterrestrial presence among us. I knew at that time that there was a plan of disclosing these technologies already that was in the process and that was going to be implemented quite rapidly.

But it is only a few months ago during the half of 2024 that he gave me more information about this. It was decided, well it wasn't a new information for him, it was part of the plan, but he said it has been decided that these technologies are going to be reintroduced as alleged new technologies, that we have discovered new technologies, but in fact it's going to take things that exist already and make them look like it's new.

This has a very important purpose. Also, it needs to follow the transition of the political events as the Deep State has still some power. The Deep State is not going to just collapse like this, it's collapsing, they are losing power at great speed, but they are still holding sectors of industries that if you bring new technologies they can block them or get them destroyed.

So that was the idea of protecting these technologies, not to be blocked, destroyed, forbidden. With law you can create very complicated sets of blockages on releasing technologies. So it's taking

this transition as long as the Deep State has still their hands on certain industries, but it's going to be to go faster and faster as I was told, that means the Deep State is going to recede, so that's why.

DR. SALLA: Well, there was this amazing story in Britain's *Daily Telegraph* where they talk about this flying Uber. And this flying Uber is something that you could actually order, that this will be a personal craft and it looks very much like a flying saucer. So is this kind of like, and we do have an image of that, so just if you can put up number two, that image shows what looks like a flying saucer, but it's somehow powered by some kind of internal mechanism. So yes, is this an example of what Thor Han was talking about?

ELENA: Exactly, exactly. And I was delighted to see this in the news. It was quite surreal, but real. And I say, hey, there we go? It has started already. The, this, well, I read the article and I looked into it and oh my goodness, it's described as a UFO-like electric flying vehicle, electric flying, but when you read the description and what it is about, it is about anti-gravity and how this anti-gravity is working, they describe it perfectly. And by the way, it's been created by a former engineer from Tesla. Elon Musk is behind everything. That's something we can talk about.

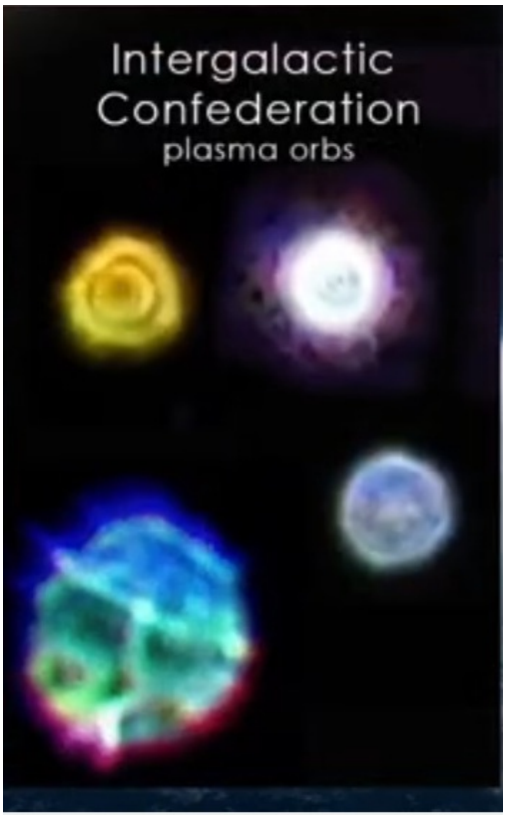
It uses spheres that are creating a magnetic anti-gravity effect. And these spheres, I think, if maybe I'm wrong, I don't remember, I think something like 6, they are around in the periphery of the, inside in the periphery on the edges of this UFO-like. And that hit me because this is exactly the technology that you can find in some extraterrestrial scout ships, exactly these spheres. Usually they have a ring that runs on the lower level of the ship. But these spheres really remind us, I know alien spaceships like that, but they remind us of the Haunebu, the German Haunebu with their three spheres. It's exactly the same, the same construct, the same technology, that is the release of this technology with these anti-gravity spheres.

What are they made of? They are, there is a torsion, a toroid inside, double toroid, which is made of, horizontal dynamic, dynamic toroid and vertical dynamic toroid. One in one, but in one, the fluid, which is usually Mercury, it can be something else, but usually mercury, runs in like this and the other like this. And it creates a torsion field. And that's what these spheres are. Torsion fields, what it does, it cancels the

mass of everything that, of the structure in which it is included.
So, I find that very interesting. I disclose this technology, in 2021 as well. And something interesting in this article, Michael, is that it says that it can send impulses in these spheres, electrical impulses to direct the UFO-like vehicle, suddenly in any direction. Oh my goodness, this is the flux liner. The flux liner. So, it's exactly like the flux liner, what it is?
It's cut like a cake with segments and you send electric pulses in the segments and you navigate the ships like this. This is wonderful. It has started and that's just the beginning.
DR. SALLA: Yes. Now, in your book, *We will never let you down* that you wrote and published in 2021. I mean, you described the Galactic Federation of Worlds Scoutcraft in that book that looks very similar. I mean, it has these, I mean, you can explain the rotating spheres inside of it. Now just, as we show that, I'm not sure. I wanted to get you to maybe like speculate how, what kind of speed would the rotation of the spheres be? Because I know, reading about the TR3B1, that the torsion field effect, started to manifest itself when the plasma rings started to flow around at 60,000 revolutions per minute. So is that what's happening in these spheres as they're rotating? So can you explain?
ELENA: Yes. So I do not know the number, of the speed of the rotation of these spheres. But what I know is that there are magnets at the start that induce a magnetic current in one of the toroids that is going to create as a reaction dynamic in the other toroid that are a perpendicular, directions. And this creates a, what we call the torsion field. It's an electromagnetic field that cancels the mass and it, when it spins faster and faster, it's going to create an ionization around the ship, a torsion field around the ship.
And if, of course, the ship is in an atmosphere with particles of atmosphere, it's going to ionize the particular atmosphere and create a plasma. So that's when you know that when a spaceship is about to take off, you do not approach because as it spins it's engines faster and faster. The torsion field is created and it can tear your particles apart if you approach. And that creates a plasma. Sometimes in the night, you can see the spaceships with, an orange or green glow, it depends on the composition of the atmosphere. And this is the ionized

air that is transforming to plasma created by the charge of the torsion field on the particles. So that's what I can explain.
DR. SALLA: Now, one of the things about these kinds of, craft with this kind of torsion field propulsion system that generates an anti-gravity effect is that if you're inside of the craft, the laws of inertia don't apply. So, yes, explain what happens if you're inside of this craft and the craft suddenly shoots off at like 100 G or 1000 G. I mean, what scientists will say, well you'll be just crushed by it all. So what, what happens with this kind of, propulsion system?
ELENA: It is the same, system as when you are in a high speed train. You can walk in it. You can move in it as you wish. You're not just pushed by gravity. Inside of the ship has its own gravitational, conditions for the habitat. So they generate, gravitational field that you can, just walk around and don't feel the cancellation of the mass with the speed, because when the mass is canceled, you don't have friction. So you don't feel the moving through the environment. So, I've been many times in these ships since I'm a child. Well, physically for those who know my background. And I can tell when the ship just takes off. You have no idea that it's taking off. You have no idea that it is moving, absolutely no sensation. You're like sitting in a room. It's very impressive.
DR. SALLA: Okay. Great. Well, that explains what happens with the kind of laws of inertia when this kind of anti-gravity torsion field effect is generated that the laws of inertia don't apply. All right. Well let's move on to these mystery drones that have been seen all over the United States, also in England. They seem to be appearing close to military bases and airports and people are speculating all about them, what they are. You did a presentation recently where you discussed the drones belonging to different organizations. So yes, the first one was the Galactic Confederation. So yes, you want to tell us what are these Galactic Confederation orbs?
ELENA: So this is part of the whole plan of disclosure from our star nation friends. They have split this plan of disclosure into parts. The Earth Alliance is disclosing the retroengineered technologies. When I said the Earth Alliance, I could say the White Hats as well. And the ETs do show the ETs presence. So they have decided to make the public accustomed to the existence of civilized extraterrestrial cultures.

And they do so by showing more ships in the sky. But there's a lot of things in these skies. There are also retroengineered, Earth-made, ships as well.
So what they do, they came up with a plan is to show orbs, what they call themselves drones. They call themselves drones, not orbs. The Intergalactic Confederation and the Galactic Federation of Worlds have different crafts that they are showing, displaying in the skies of Earth.



The Intergalactic Confederation, as you show on screen, they are a more advanced civilization and group of civilizations and they used technology that is based a lot of using consciousness and to embed consciousness in technology. The easiest thing to do is to use plasma, to make plasma conscious by polarizing it and creating a pulse in a plasma that is going to be able to entangle with an extraterrestrial consciousness. There's a lot of things out there.
So you have this type of orbs which are conscious and people have had extraordinary experience with seeing these orbs and feeling a presence communicating with them. That's because it's conscious.

And all the orbs are drones, remote viewing drones, drone-like cameras that you, to just recognition or scout ship little cameras. And these are filming and taking information and calculation and studying all sorts of things and sending the data by a quantum way of communicating, teleporting the data from the plasma to a technology that can be ownership in orbit of Earth or in an underground base, for instance, or anywhere else. So these are these plasma orbs.
And there was a French contact here, Robert Lautel, who spent a year in the base of the Intergalactic Confederation in the Himalayas, who saw these orbs a lot because these orbs were visiting the farm of his parents in south of France. And then he had visitors visiting him in his bedroom for a few months. And then they offered him to come to their base in the Himalayas, where he accepted he was taken on board a spaceship and he spent physically here there. And there he was shown the other side of these orbs, a device with a screen. And you could see remotely what the orbs were seeing. The orbs stayed at the farm of his parents in France, very far from there. And he could monitor on the screen what was, he could hear exactly what was going on. It's incredible. He could bring this testimony.
DR. SALLA: Robert Lautel with an orb. And I think this was 1969 or 1968, something like that. So this is an old historic case in France. And a book was eventually published about it. And then the monitor that you described, so that's image number eight. Yes, I mean, that's quite remarkable. You want to explain a little more about exactly how that was producing the output of what the orb was seeing?
ELENA: Yes, so there's a quantum entanglement technology here at play. Do you all be teleporting information? It's like a remote view in camera, like a surveillance camera. It's exactly what it is. And so you could press buttons, he said, to hear the sound or to move the orb, the angle of vision. So any could see it on the screen. That's why he was very impressed with that.
DR. SALLA: Yes, because I think he was only 18 or 19 when he went to the Himalayas to spend a year at this extraterrestrial base. And as I recall, the Intergalactic Confederation or the ETs that that took him there for that time, they did they create, I think, a clone, right? There was a clone version of him at his home so that they could see what was going on.

ELENA: Yes. Yes, yes. And they got him for his genetic material because these ETs, as you described them, were populating worlds with a human genome. And they were calling themselves Intergalactic Confederation. They were tool-white people, humans, and they were under the management of the nine. This was in 1969. And this blows our mind because this is the information that transpired through the communication of Phyllis Schlemmer and also the contact I had with them also. So that's very interesting.
DR. SALLA: Okay, so those InterGalactic Federation orbs are plasma orbs with all of these properties that you were describing. And then you describe the Galactic Federation of Worlds orbs as being kind of metallic. That's very different. So you want to explain that?
ELENA: Yes, the Galactic Federation of this galaxy, it's a small federation, compared to the Intergalactic Confederation that gathers many galaxies. So these ones use a Galactic Federation of Worlds use mainly metallic technology. They are less advanced and every metallic or solid vehicle you see, it has all chances to be the Galactic Federation of Worlds.

Mind you, the Intergalactic Confederation we were talking about just before also has solid ships, right? We were talking only about the drones and the plasma drones. The Galactic Federation of Worlds that we see here, yes, it's more metallic technologies.

DR. SALLA: Okay, so, but these Galactic Federation of Worlds orbs, even though they're metallic, they have similar functions, they're useful, I guess, surveillance, monitoring.

ELENA: Yes, same functions. Yes, when I say metallic, they can appear metallic looking, but it's not exactly metal. The construction material is a very special material that is half alive animated with AI it's very reactive to the environment. It's more time to get.

DR. SALLA: I've come across a few experiences with JP and one of them that says that he has seen orbs appear in his home and that they have transported him to different places. So would that be like one of the plasma orbs of the Intergalactic Confederation or would that be one of these orbs from the Galactic Federation?

ELENA: Can be both because these orbs can also be used for all

sorts of things. They can of course teleport people. I would be more inclined to believe it is the more advanced ones, the Intergalactic Confederation because of the technology, but also because following the accounts of the missions of JP and reading your books, Michael, it is clear to me that the Nordic contact with may well be the people from the Intergalactic Confederation.

DR. SALLA: Interesting, okay, or at least connected with them in some important way. Yes. Okay, so next you took this photo of an orb object following your plane and that was, and I guess you realized or were told that it was a Galactic Federation.

ELENA: Yes, you see it on the middle of the photo on the right. You see a little black dot and there's another one I gave you that is I zoomed in, but it was taken from the window of the plane. That's it. Where I zoomed in. It was following the plane at great speed and then it stopped and the plane went on. It was above Germany, last October.

DR. SALLA: Interesting. So this is an orb that Galactic Federation metallic and Thor Han told you that we're monitoring you.

ELENA: Yes, I often have either orbs or drones or extraterrestrial drones or ships who follow me when I travel and I'm always looking at the window and this is one of them and I contact Thor Han and he says, yes, it's one of our orbs, one of our drones. And it was really round and you could see the reflection of the sun on it. Yes, it’s metallic looking. Yes, difficult, the photo through the window of the plane is not always clean and anyway.

DR. SALLA: Okay, like I said, you could see that orb. Was there any way you could you sense it? Could you feel it or any way was it transmitting any kind of energy or was it just doing its surveillance and that's it?

ELENA: I didn't feel a bond with it, but at that moment I felt compelled to take my attention of my book and look by the window and I saw it. It was interesting.

DR. SALLA: Very interesting. Okay, so now let's move on to the government or military orbs. So yes, exactly what kind of technologies are these using?

ELENA: These are classical drones, Earth-made drones. It's the very enhanced version of the drones we know, but it's used by the military and you can really see the difference first. They're noisy. All the [ET] spheres and orbs are making no noise and these do at a certain level and they have these different lights that light up at night. You see the photo below any you have extension and arms and it's never round. It's always different shapes. Sometimes crazy shapes, but you have also these light and it doesn't really travel very fast, I mean, yes.
DR. SALLA: Okay, so we're kind of familiar with these kinds of drones that many people have seen or you can actually buy some of these commercial drones. Now the ones that are operating near the military bases they seem to have some kind of stealth technology, some kind of ability to evade the kind of like sophisticated radar jamming frequencies that the military uses to take down drones.
So yes, this has led to a lot of people questioning exactly what are they? And then you had on New Year's Day, you had this very strange incident involving a green beret active duty green beret who apparently blew himself up in front of the Trump Tower. But he had sent an email manifesto though previously to a another military veteran and they talked about it on the Sean Ryan show and according to this green beret, Matthew Liversberger, some of the drones that are operating near the military bases he referred to them as Chinese drones operating with anti-gravitic propulsion systems. So that kind of raises, and I know Stephen Greer, he also talked about this and made it clear that these were these were drones that were actually controlled by the Deep State using their Chinese assets.

So it wasn't the Chinese government behind these, some of these drones that were coming in off the Atlantic Ocean from submarine there. It was this renegade Deep State Chinese element that was doing this. So yes, now I'd like to get your comments about that and why you think that is part of the show.

ELENA: Well, first you have to ask the question, why they are not taken down, especially by the military base? Mind you, with NORAD and with all the technology, the defense systems and protocols in the US. Do you think that they would just let foreign drones just fly by even a military base without doing anything?

Why aren't they shooting them down? It's because it's theirs Michael. It's the military, it's part of the plan and they have orders not to shoot at them. So what I know, okay, with this disclosure of ET drones, alien presence, of course they knew there was going to be a reaction from the Deep State.

As they always do when there is a disclosure they muddy the waters, they spread confusion by overwhelming the truth with their own deception. They have done that on many levels all the time. And I've mentioned in one of my podcast, this Poor Billy Meyer, who had a real experience, but some photos were just replaced by a fake. Do I feel that it could be accused of fakery?

But it's exactly the same. The Deep State is seeing all these ET extraterrestrial drones, the orbs, we are going to call them orbs to make the difference. Swarming the skies everywhere and now we have the cigar shape as well. So the plan was to swarm the sky with even more drones from their manufacturing and then people would be confused and the military would be able to say, well, see it's not ETs, it's Earth-made. Look at that, we've taken them down, look at that, that's Earth-made. Oh, it's made in China, it's made in Iran or whatever, they can exactly pretend it's copy a technology that exists in China, for instance, and accuse the Chinese.

So take this opportunity to serve their different agendas that they want to start a Third World War for a while. They are trying hard. So that's an opportunity, hey, why wouldn't we take it. This is what I think is happening.

DR. SALLA: Okay, all right, so the Deep State is launching waves of its own drones that are more advanced than commercial drones to

kind of obfuscate, confuse people over the genuine orbs that are being launched by the Galactic Federation and the ETs more generally.
Now, JP was taken on a mission fairly recently where he says he saw these Earth Alliance ships that were cigar-shaped that were about 50 meters long and that they are going to be launched very soon and people are going to see more and more of these cigar-shaped ships and they're going to be a prelude to the even bigger craft belonging to the Federation, the Intergalactic Confederation and space arks. So you want to talk to that?
ELENA: Yes, well, as your audience just saw the little image of the Galactic Federation of World's drones, you have first the spheres, then the cigar-shapes, then the flying saucer-shapes, this one, that's the order of disclosure. And what JP was shown on, I remember, it was disclosed on your channel on the 14th of December, but in fact he had this experience before, of course. So and like a week or two, maybe two weeks later, there were all suddenly this cigar-shaped ships appearing in the skies, especially Brazil first and then there were other places.
So what are they? These cigar-shaped ships, I've been in one of them a while ago, a few years ago, there are cargoes that transport little scout ships and they use inter-dimensional jump, they're not traveling linear, they use like a kind of a portal, they create themselves. They teleport to distant locations. The scout ships will enter on one side and go out on the other side. And inside it's like a big hangar, it's very, very empty. You have the habitat and all the rooms on the top level under the ceiling and all the bottom is the technical area where you can repair ships or all kind of technical devices. I don't know what it was about and you can see ships arriving one side landing on platforms, it's like a long terrace and then on the other side there's a launching pad and they can just go in and go out the other side.
These cargo ships were given to the people of Earth by extraterrestrials from the Pleiades, that's where they were made. So that's a very, very common technology in the Pleiades and these were given to Earth, it's very interesting to both sides of the story. They were given these ones are the ones that were offered by the Galactic Federation of Worlds to the US Navy.

And you have other cargoes that were also given to Earth, but to the Nazis. By people from the Pleiades also, but from a star system that is Alsion and they were Nordic type beings and they worked with reptilians, sicker reptilians or Alpha-Draconians as we know them, worked with the Nazi closely at building the fourth Reich and you know about all their presence in Antarctica.
So these were also given the other side of the story. The one we see on screen, I saw I don't know what where it was taken, it can be either side, but it's difficult to see, to say because it's the same technology. But the ones we are seeing now for sure, it's the good side because all the regressive ETs have been kicked out. So all the ships we see in the sky that own extraterrestrial origin at least as a technology are positive.
DR. SALLA: Now that's a very important principle that you just described how the Pleiades that they approach a planet like the Earth which has competing nations, they do it in a way to maintain the balance and so of course during the second war it was the Allies. They got some craft and the Nazis got some craft. Now in this kind of post-war era I believe it first started off that the Soviet Union got craft, craft that crashed there and as did the United States and craft were given, some crashed, and so and you have some cases like I know the Aztec UFO case from 1948 is a good example where the occupant that survived said that another ship would be going to the Soviet Union to do the same thing. So that they were doing the power balance, keeping the power balance. Now today it's the United States and China that are the two like I guess the two major nations when it comes to these advanced technologies. So would that mean that craft that are given to the US today that similar craft would be given to China?
ELENA: Not by the same people I suppose, but I wouldn't be sure of that. You know when you were talking about balance during the Aztec crash that was right, but regarding the second world war and the building of the fourth Reich it was competing parties and different group of extraterrestrial from the Pleiades who gave the US Navy and the Nazis different the same technology.
Who gave the US Navy these type of technologies? It was Pleiadians from the Taygete Star System and the Federation, Galactic Federation

of Worlds that was created by the people from the Taygete Star System in Syria's B and that are mainly managed by these people. Who gave the Nazis this same technology Pleiadians from Alsion, a different star system Alsion is not part of the Galactic Federation of Worlds because they are dissidents. Now sometimes it's about balance like with the Aztec crash. Sometimes it's not. It's competing parties who play with the Earth, different factions like pawns because they had their wars upstairs and so they have played, on Earth, with different human parties. So did the Federation give ships to China? I would be skeptical about that. I don't have this information, but when there were these Jupiter agreements in July 2021, I remember China was not part of the final agreements of building this star fleet that would look after our star system and China decided to go rogue and to compete against this alliance that is represented on Earth as the Artemis accords. So I'm not sure the Federation is giving technology to China.

DR. SALLA: Yes I think that what you mentioned the Jupiter accords are very important because that represented I thought a very profound agreement and a consensus by most space faring nations that went there, that the US would be the lead nation in coordinating the Earth's nations in interacting with extraterrestrials disseminating the advanced technologies, but China, as I recall Thor Han has said afterwards, has kind of essentially gone rogue and is not operating within the parameters of that agreement. So does that mean in terms of like today and China is kind of like the main geopolitical rival to the United States, that another group you know whether it's the Alsions or whether it's the Aldebaran or someone else is now helping the Chinese.

ELENA: I don't think so. It's my speculation would be that it's not another regressive faction of ETs because they've been kicked out of the star system and the Alsion have they are redeeming at the moment actually, but they are not being interfering with us since 2021 when you know all these [bad] ETs were kicked out.

What I would speculate is that China got their hands on this technology at one point in recent history and they've retro-engineered them and they've been helped by regressive ETs before they left. They are developing. They have intelligence they can copy what is out

there on Earth in other countries. They can really copy and so I'm sure it's not given by regressive ETs or other factions.
DR. SALLA: So that would leave then kind of like the Deep State and kind of like the corporations that are still aligned with the Deep State that are working closely with the Chinese.
ELENA: Yes, that's it, exactly what I mean.
DR. SALLA: Okay that's a big concern then you know because China is such a powerful nation and such a big industrial manufacturing base. I mean even now I mean China's conventional navy is bigger than the US navy and they're saying that the Chinese Air Force will soon be bigger than the US Air Force. So you wonder if something similar is going to happen in space.
ELENA: Well after my contact Thor Han he was saying that China will compete. They will go full beam competing against the Artemis Accord and this new Starfleet. They would go and compete full beam and, but this will lead them to their commercial demise that they will exhaust themselves financially into this run.
That's how he sees this happening and because in the sight of the Artemis and kind of new Starfleet coalition of countries space programs I mean it's going to get bigger and bigger and bigger, not forgetting that they are allied with the Galactic Federation of Worlds and that they have also used advanced technologies for decades in the secret space programs as well.
So there's a lot of technologies a lot of resources on the side of the Artemis side and it surely looks like China is threatening, but from a perspective that he's taking everything in account. They are not all that threatening and they are going to exhaust themselves. That's how they see it upstairs.
**47
DR. SALLA: That's good to know. We're recording this on January 16 and of course in four days' time Donald Trump will be inaugurated as what is it the 47th president of the United States and on January 25 there's going to be a rare planetary alignment so what is the significance of that planetary alignment the Trump inauguration and what what's going to be happening in the future?
ELENA: Well there are planetary alignments very regularly, but there is one just at that moment of the inauguration in the total perfectly

alignment with beyond the 25th, but it starts on the 21st, exactly when the Trump will be inaugurated.
This doesn't go unnoticed because when there is a planetary alignment and a six planet, seven with Earth, it's huge. It creates a gravity pull that is extraordinary and a gravity pull is, gravity and time are interlinked.
Time is linear, when there is gravity and the linear timeline where we are on, it impacts it. What it does, it crystallizes it in the way how it is at that moment. Everything that's happening on all these planets at that same moment in these gaps of few days is set into the fabric of space-time, gravity-time as we could say that.
That is why this inauguration, this election is so crucial, so important for the future of humanity because whoever is the candidate that arrives at that moment he will be the one who will start the new dawn of humanity, the new timeline in bad or in good.
And that's what the run has been about and Trump arrived and that's going to begin and that's going to be the progressive timeline for humanity and now it's set, so that's why it is important.
DR. SALLA: Well it's certainly very auspicious that Donald Trump has as of today it was announced that on Sunday January 19 Israel and Hamas are going to implement or start a ceasefire agreement where they release hostages and release prisoners and so forth and that's going to stop the fighting.
I think it's such a perfect kind of like prelude to what Donald Trump what many *hope* that the Donald Trump administration will do which is to actually bring about peace and just have all of these agreements reached between conflicting parties, because I know that the Deep State thrives on conflict and they have been stopping agreements, but now Trump has won. The Deep State was defeated and so agreements are now going to be implemented and this is going to bring about peace on the planet and that I think is a very important harbinger of what the Galactics want us to do, so that they can start showing themselves and share more technology.
ELENA: Yes exactly, and people will be impressed how fast it's going to go yes, and peace is the only ground upon which a progressive future can be built. If there is no peace you cannot bring new technologies because they are going to be weaponized, so peace is a

major requirement.
DR. SALLA: Yes I think that's very important. Now Elon Musk, he did a tweet recently where he talked about where he said that the Moon is a distraction and he plans to go straight to Mars.
So this there's the tweet by this Peter Hague says… oh well let me read it out:
There is a long-running debate between the Mars people and the space habitat people Zubin versus O'Neal, Musk versus Bezos.
I have thought for some time now it's essentially futile in the commercial age because the two camps are no longer competing for a fixed pick of launch and Musk replied, “No we're going straight to Mars, the Moon is a distraction.” So yes, well why is wise Musk so fixated on getting to Mars.
ELENA: Well, Musk is not against the Artemis project of taking the Moon as a landing base to go to Mars I mean jump transition point to go to Mars is not opposed to that, but he says it's a waste of time because why would we need to stop first on the Moon refuel and go to Mars, it’s because the NASA has corporate agreements with companies to just make a little bit of profit on the way.
He says let's go first directly to Mars. I can do that, so let's go there first. why is he eager to do that? It's because there's a plan, he is working with the Federation he's working for the plan of catching up of the technologies, the catching up of the hidden history of the Secret Space Programs.
He's actively he's been working on this and he's going to pretend reinventing technologies, but he will disclose them. What is going on Mars? Why so fast? Because it is time that humanity catches up with the normal course of an evolution of a planetary culture. We are late on our evolution and things have gotten stuck on Earth. The normal evolution of planetary culture is to make colonies on other planets and multiply and breed and develop and prosper out into space.
So Mars is the first step. That has been taken away from us and now Elon Musk is doing the catching up. On Mars there are colonies of extraterrestrials that have moved in since Mars was liberated in 2021 from the Alpha-draconian's Dark Fleet and the Grays as well, but most Alpha-draconian's Dark Fleet. Now Mars was given was given back to these inhabitants, local peaceful reptilian species and some insectoid

camps, but also there are colonies in cooperation with these locals who have settled and created biodomes and started terraforming Mars to give it back its ancient atmosphere and make it habitable and breathable again.
So there's a lot of work of terraforming. This famous earthquake that I announced a few years ago it's part of two years ago I think it's part of this big terraforming and these are preparing soil. That's information I just got recently from Thor Han's brother who works on Mars. These colonies are preparing habitat and ground and fertile soil to “welcome” as they say the Earth colonies into these facilities that they when they arrive they can straight away cultivate the soil.
DR. SALLA: Up until its liberation in 2021 it had been colonized by the Dark Fleet by the Interplanetary Corporate Conglomerate and apparently they had built huge industrial complexes there and military bases there and that there were like millions of people living on Mars. So we know that the that Mars had bases that had been created by the Dark Fleet by the Interplanetary Corporate Conglomerate where apparently there were millions of people there that were producing all of these advanced technologies for the corporate program for the Dark Fleet program and of course you've described the process whereby the Galactic Federation helped indigenous Martians, the reptilians, the insectoids, liberate their planet from the Dark Fleet from the corporate program, but you know what happened to the millions of people there in their big bases are they were they relocated are some of them still there in some of those bases that are now controlled by indigenous Martians and I'm wondering how that might impact Musk's colonization plan. Were these people were temporarily evacuated?
ELENA: During the liberation of Mars there was a big war. The Federation was involved and some contingents of the Earth alliance were involved as well notably the Solar Warden Fleets.
When these facilities were liberated from the occupation by the Dark Fleet, it was liberated and locals were allowed to rush into all these installations and just make do their marks. Nobody wanted to be there, for local reptilians and especially insectoids tall insectoids to rush in and just celebrate. And then the federation say “Okay now it's your planet it's yours, but may we cooperate with you.” So they accepted their meetings.

The people were evacuated. Many were brought back as they chose to and many others were relocated.
There were a lot of people. You can't bring them back to Earth. They they've never been to Earth and that would have been really strange, all these people. But you know there's a reason as well where they weren't brought back to Earth.
It's because they were born from at least three generations back on Mars which has different gravity, different atmospheric pressure, different magnetic resonance, and to live on Earth because they were there from generations few generations they couldn't physically live on Earth because the gravity and everything is different. So they had already mutated into a different branch of humans, so that that was the thing as well.
DR. SALLA: When Elon Musk sends the first starships to Mars and according to Elon Musk and Donald trump that's going to happen by 2028. So the first manned starships because they're going to send starships before them, but I think 2026 I think they're going to start sending starships with supplies and so forth to Mars and then there's going to be the first manned starship missions to Mars which will establish the colonies so these colonies that SpaceX develops on Mars will they essentially kind of like just merge with the human colonists that that are there?
So it's really, not really, starting new colonies, it's just like rebranding old colonies and saying “Oh look Aries Prime is the name of this new SpaceX colony there, but as Aries Prime has been around for 50 years.
ELENA: That is exactly what is going happen. At one point Thor Han said to me are they going to rename Aries Prime to just forget about the past and finally they decided to keep the name for memory. So it will be still Aries Prime, but as different colonies or also are there new ones.
Interesting fact, the Alpha Centaurians who have built colonies recently there two or three years ago, Thor Han was giving me this information that he was accompanying part of a project of accompanying Alpha Centaurian colonies ships to Mars to populate Mars and in agreements with the local merchants, of course.
It's a big planet, so there's a lot of room there and build these

biodomes and start trarraforming the planet. Interesting fact, they are, in fact, Alpha Centaurians. When I met in 2020 this Alpha Centaurian lady who told me about Elon Musk was about to play a great role in the future of humanity. She was from the Alpha Centaurian systems and she said to me because he is one of us. So that was something that I'll never forget and still have Alpha Centaurians on Mars, you know what I mean. it's no coincidence.

DR. SALLA: Okay so that means that Musk's rush to get to Mars is really driven by his knowledge, whether it's conscious or unconscious that the Alpha Centaurians, his star seed lineage, is already building bases there.

And so if they get to Mars then what's SpaceX going to be doing on Mars is going to come like merge or complement what the Alpha Centaurians are doing there.

DR. SALLA: That is fascinating well there's another aspect about Elon Musk's plans that has a lot of people very worried and that is neural link and recently there was a story about a third patient just getting the neural link implant and this this again was a person that was very sick and or physically incapacitated so you know they would be able to communicate electronically or telepathically with a computer and technology and that was part of the justification why neural link is a is a good thing and according to this story that in 2025 it's going to expand to 20 to 30 people presumably again people who are incapacitated, but at some point healthy humans are going to start having these neural link brain implants and according to Elon Musk people who go down that path of having neural link and these kind of likes technological implants that's going to help them defeat AI in the future so and of course some people have criticized this and said well neural link is AI so how can you get AI to defeat AI, but of course I think neural link is not AI it's something else so you want to bring clarity to all of that?

ELENA: Yes, so Elon Musk is known to have warned people of the dangers of AI for a long time now. So what is the technology that he develops? It's not AI. What is AI? It's in Artificial Intelligence. It's a computerized program that's gone so far that it starts to make decisions by itself.

That's not what these devices are. They are a technology that has a

program to make a blind mind see or make a disabled person walk or all those kind of things and it's just a device. It can be a medical device. It can be a communication device. I have one in my skull put there by extraterrestrials. It's a communication device, I switch it on and off like a walkie talkie and it's more advanced than what Elon Musk is offering.
What he is offering, why he says he's fighting AI, because this is not AI because he doesn't want people to get unethical organizations to sell the device to put in people so it can control people at distance. That's not what he is doing. It's not for devices that will allow people to be remote controlled. It is technology that is just a different tool. It looks like AI, but not conscious AI. It's not the same thing, so it's is a very hot topic because I bring my perspective to this because I'm in contact with more advanced civilizations and technologies and I benefit from it. I use these technologies to communicate and there is no program in the device I have in my body. That there's no programming it's just a communicator, a teleporter of information and people are not accustomed to this technology yet. There's a lot of confusion, of course, but that's what the Deep State does, confusion. There are all these medbeds that are going to be in the process of being implemented, but it's not going to be accessible like this for everyone. It's going to follow a long process first more severe diseases, first the veterans, and the kids, then severe diseases and etc.
Someone who just has problem in his leg, on his leg, he can't walk maybe, he'll have to wait a long time.
Maybe he will want to try Elon Musk technology. You never know. That's a choice people will have the choice to try whatever they want. That's what Elon Musk Elon Musk has, ethics. Believe me that's not the case of the people who criticize him the big organizations who criticize him why because they know he's a danger for them because he's bringing a progressive future and he is on the side of humanity. He's always been. So even AI in the wrong hands, it can be really disastrous, but in the right hands, the technology I see when I'm on board the ship, I see pilots having a brain implant to pilot their ships and it's a very secure way of communicating with the intelligence, with the AI of the ship, it's like a communicator with another intelligence.

There are so many different types of levels of these implanted technologies. Thor Han has one in his arm. It's like a holographic sheet [like a living tatoo] that is put in under his skin. It's big like this [8 inches] long, and it allows him when [with a scan motion] he can use his wrist sometimes to buy goods. I saw him do that, but that's because he is in the Federation, is in the army, and that's what they do. It's a requirement. You need to have that, but it's by choice. What Elon Musk suggests, I mean it's not forced. It's just if you want it, you get it. If you don't want it, you don't get it. If you can cure yourself with natural medicine or energy work or consciousness work, if you're able to do that, do it. You have the choice. We will always have the choice.

DR. SALLA: So there's different forms of artificial intelligence some can be more benign be used safely and other AI can be more maligned and used by regressive groups for negative purposes. Okay, so well that does that does make sense because I mean like a gun is something that can be used for positive or negative purposes.

ELENA: Absolutely, as I was saying I have a brain implant and it's only a communicator. It also has a function of creating a magnetic field around me that protects me, that can also it can also create a holographic shield. I have actually a holographic anti-remote viewing shield constantly, but that's a technology that just does that. It has no awareness of itself it's just like you know a screwdriver has no awareness of itself, a walkie-talkie has no awareness of itself. That's a difference, they are different tools

DR. SALLA: Now I know you've talked quite a bit about the discovery of an armada of Gray hybrids that have been discovered in the Orion nebulae in some kind of interdimensional pocket maybe you can explain that and that there were hundreds of millions of hybrid high Gray hybrids in those craft that once were going to be used for some kind of invasion or takeover of Earth that was aborted. So you want to tell us what was involved in this armada and why it's lying stranded somewhere in the Orion nebulae?

ELENA: These hybrids Gray human hybrid had been produced by the Orion Grays the Orion group who included different Gray groups the Belege Ebands who made the deal with the MJ-12 in 1955 with zeta reticuli and all different types of ETs. They started this program in

1955 of breeding themselves in. They cannot invade the world like this. They would bridge the prime directive. So what they do they create kind of consensus by trying to get the population to consent to be invaded.
So they say “Oh we are you from the future. We need a little bit of genetic material.” They cry a bit and the military authorities and the leaders say “Yes, of course, take a few people to renew your genetic material.” And the Grays yes they go, “Yes sign here and you don't mind our business, we don't mind yours just give us facilities on Earth.” And once they were in that was it.
So they start this hybridization program, by abducting about a million people every year even more millions of people every year to create mass produced hybrids. To what purpose? To replace humanity on Earth with these hybrids to replace them.
And these millions of abductees were taken into factories on board ET ships and used as breeders. So imagine hundreds of millions of hybrids have been created, hundreds of millions.
Where were they? Well when there's been a big operation of cleansing the Deep Underground Military Bases and in the undergrounds the Earth Alliance found a lot of facilities with hybrids, but not that big amount.
But these hybrids were from a different type of experiments. These were performed by the Earth military, the dark programs that were working with the Grays what we would call the Milab programs. They would get the Grays to abduct people or fake Grays also making people believe it was this and get abductees into the military bases and from their experiment themselves with hybrids. So these ones were rescued, but these ones were not the problem. The problem was where were all these hundreds of millions of hybrids created since 1955.
We didn't know what they were. Well they were found a few months ago thanks to the help of the Kiddie Tokert which is a culture that was formerly associated with the Orion Grays.
They said to the Federation well in exchange of a few commercial agreements because they're traders we give you the location.
So they did and it was behind the Orion portal nebula and 42 the trapezium cluster center of the former Nabu hive that they found this

interdimensional bubble like a micro mini universe the Grays were able to do that because of the nebula, the vortex of the nebula, it was a very special vortex. They were able to create a bubble to hide them. It was a dimensional bubble like a parallel universe, very small, with this armada of ships cargo ships having all these hybrids and they were hidden there awaiting the right moment to be brought to Earth and replace the population of Earth that would have been culled or killed or god knows why or what.

DR. SALLA: Okay all right so that was the plan that the that the Grays had in terms of having their hybrids brought to Earth and taking over the planet. Now I did an interview recently with Dr. John Brandenburg and he also described the failure of the great hybrid agenda, but according to his analysis or his view and it was because ultimately they couldn't adapt because the Grays had a copper based blood whereas humans have an iron based blood and that no matter how much they kind of tried to tinker with the blood of the hybrids they were always kind of weak and anemic in terms of you know being on the Earth and so this led to the failure of the hybrid agenda. So does that make sense or do you know anything about that

ELENA: What I know is I would agree with him that they have struggled a lot in the hybridization program. That's why it's been going on for so long and they've tried a lot and they've created so many hybrids. They've always been trying to crack the genetic code of humans and it was very difficult for them.

So that's why you find all different shapes and appearances of hybrids. Sometimes they have big heads, small eyes, big eyes they they've been experimenting a lot. That's why they were abducting so many people as well these hybrids that were found were bodies without a consciousness. So they were actually operational bodies, but nobody knew they were there until a few months ago so even this person couldn't know either.

I did not know, nobody knew that they had managed to come out with these bodies that were ready to be interfaced with the Gray hive which was dismantled, so it didn't happen. So that's my knowledge of the story which in a way correlates in such a way if you want.

DR. SALLA: Well that was a very interesting correlation because Dr. Brandenburg has his own information sources and I thought it was

very interesting that he'd reached a similar conclusion to yours or what you were told that that matched what he discovered through his own independent research. Well my last question is really this the duper the hub what's the latest on that when is when will that be ready for use and when will we in the general public like a hop on our Uber flying saucer taxis and take a ride up to the hub.

ELENA: Well great you mentioned the Uber, the taxi because if it really uses mass cancellation we can go into space with it, if it's a proper UFO, as we say, we could go. That it would take time because so these little UFOs they need to be equipped with warp drive and because the Jupiter is quite far so, but you never know.

These technologies are being disclosed so fast. What is the Jupiter hub? Well it's something that's been created, started to be built two years ago by the Intergalactic Confederation who have a fleet in the orbit of Jupiter.

Not a lot of ships left now. They've mostly moved to the outer edge of the star system so out to the Oort cloud still looking after the star system. They're not gone. They're just a little bit further, but they have left some ships in the vicinity of Jupiter and they've helped the Earth Alliance build this hub and they've given one of their mother ships that we can see in this reconstitution here in the center white flying saucer shape so they thought it would be great to give the people of this star system of this commercial hub.

It is located near the Stargate behind Jupiter at this interdimensional vortex. It's a natural occurrence that is locked in the gravitational field of Jupiter and this hub welcomes people coming through this vortex that are really vetted, really, really vetted by the Earth Alliance and a military presence that is on Jupiter that is the Ashtar command station. So that's interesting too. And this hub is going to be here as a place of meetings, of reunions, of leisure shopping. You never know what, but all ethical, very well regulated, no slave trade, no weapon trade.

DR. SALLA: So it sounds very similar to the Deep Space Nine that Gene Rodenberry inspired and of course that was a very famous series. So yes, it was Gene Rodenberry and his script writers of that series kind of like helped by the Galactic Federation to envisage this kind of future.

ELENA: Yes, I think so. Star Trek is a disclosure and the original series as well as Deep Space Nine and both were written by Gene Rodenberry if I remember well, who got knowledge, first-hand knowledge from two sources Phyllis Schlemmer channeling of the Nine. I know I'm against channeling, but this one was really well done. It was a real scientific experiment and contact with the Galactic Federation of Worlds gave him all this information about the Federation, incredible. I started again to watch the original series and with stepping back after all what I have lived in my life and all the

technologies I've been confronted to.
They talk about technologies that we just learned how to rediscover now, plasma compression, torsion field, diluteum crystals. That's amazing, it's incredible. It took a mercury engine and toroids, I mean all these technologies they were trying to disclose it to humanity already.
DR. SALLA: Yes, it is amazing and I think sci-fi writers I think many of them are kind of overlighted or inspired by extraterrestrials feeding them information about a future that is coming. And of course they write about it. These books become popular and all of a sudden that that future gets manifested in the civilization. So I think that's really a fascinating process.
ELENA: Yes and Deep Space Nine is amazing because you have the Nine who it's fantastic the Nine made contact again you know this second part of the century you know finished lemur and then I was contacted as well, but also did this vortex and then this hub and the planet which is Bajor in Deep Space Nine for stuff for the Trekkies now sequence for the Trekkies. Bajor has just been liberated from reptilian occupation. Oh my god that's early and they are in a probation period to and to join membership with the Federation which we are as well here now. This is this is just great.
DR. SALLA: Yes, I had the same feeling when I watched Deep Space Nine it was like oh Bajor is like just a metaphor for the Earth we are going through the same situation. It really is amazing.
ELENA: Yes, and you have the spiritual religious transition everything is this mentioned it's fantastic.
DR. SALLA: It is. Well so Elena people that want to know, I know you have a webinar series and you have a weekly Star Nations News series so can you talk about those and where people can go to watch or sign up.
ELENA: Well I have a website Elenadanaan.org where everything is centralized there you find my webinars, my books, everything you want to find about me. Then yes I do these webinars on crowdcast once a month it's Q&A's in the moment so the next one is 23rd of February and I do Weekly Star Nation News which is me sharing information I get from my contacts in the star nations every Monday on my YouTube channel.

DR. SALLA: Wonderful, well I want to thank you so much for sharing all this really amazing intel and I look forward to your next webinar and the next Star Nations News and I look forward to doing another interview with you in a couple of months.
ELENA: Thank you Michael
DR. SALLA: Thank you aloha.
